ABOUT

I am Kaan, a fourth-year student studying Computer Engineering at Karabuk University. I am always open to learning and improving myself. I have been working on web and cybersecurity, developing projects in these areas.

However, I believe I can work in any field. On the web side, I have projects in front-end (HTML-CSS, JavaScript, React) and back-end (PHP-Laravel, Node.js, Express.js) development. I am knowledgeable and experienced in using shared hosting and Cpanel. I have knowledge of C# .Net and have projects in that area as well. In particular, I have multiple comprehensive projects with Node.js - React.js, which you can check out on my GitHub profile (https://github.com/kaanboyacii).

I have confidence in my projects and myself, and I am constantly improving. Additionally, I have more than five published websites that I have developed as a freelancer. I am currently focused on web development.I'm ready to work remotely.

WORK EXPERIENCE

2020-2021 (10 months)

Store Management
İz Market / İzmir

Invoice entry and exit, invoice system management. Employee management, Project management. Poster design (Photoshop skill).
